PROFILE

I am a passionate software engineer, recently graduated With hands-on experience in MERN stack development. My projects have honed my skills in building dynamic, high-performance web applications, emphasizing clean code, security, and user experience.

EMPLOYMENT HISTORY

MERN Stack Trainee at Skilovate (Devsaar), Sargodha
August 2024 — November 2025

Trainee at Skilovate (Devsaar), collaborated with the team to successfully complete a project, including full documentation. Took on roles as both team lead and team member.

Freelancer at Fiverr, Sargodha
November 2022 — Present

Level 1 Fiverr freelancer delivering high-quality services focusing on professionalism, efficiency, and client satisfaction.

EDUCATION

BSSE, Virtual University, Sargodha
December 2020 — March 2025

Recently completed a Software Engineering degree with a strong foundation in development, problem-solving, and teamwork.

★ PROJECTS

Portfolio

Developed a dynamic portfolio website with an admin panel using MERN stack, enabling secure content management and a responsive user experience with Tailwind CSS.

myNotebook

Built a CRUD-based note-taking app using MERN stack, enabling users to create, read, update, and delete notes with secure data management and a user-friendly interface.

News App

Developed a News App web application using MERN stack, integrating a news API to fetch and display daily updates with a clean, user-friendly interface.

BookStore

Developed a Bookstore web app using MERN stack, implementing custom APIs to manage book data with features to browse, add, update, and delete books in a responsive interface.

TextUtils

Built **TextUtils**, a web app with various text manipulation tools, allowing users to count words/characters, capitalize text, remove extra spaces, and convert text to speech for easy listening.
